

TWO SYSTEMS. TWO DIFFERENT JOBS.

Your CRM manages the relationship. ExpoLead manages the exhibition journey.

ExpoLead does not replace your CRM. It gives your exhibition team a purpose-built workspace for the part of the commercial journey that happens before, during and immediately after the show.

EXPOLEAD OS · THE EXHIBITION LAYER

YOUR CRM · THE RELATIONSHIP LAYER

01

Before expo PLAN

- Set targets
- Identify companies
- Prioritise booths
- Prepare objectives

02

During expo CAPTURE

- Record conversations
- Identify opportunities
- Set priorities
- Note next actions

03

After expo CONVERT

- Follow up
- Track commitments
- Progress opportunities
- Read exhibition outcomes

SHARED GROUND · OPPORTUNITIES & FOLLOW-UP

04

Ongoing sales MANAGE · CRM

- Contacts & accounts
- Deals & pipeline
- Activities
- Customer relationships
- Revenue

CRM systems are excellent at managing structured customer and sales data over time. ExpoLead is purpose-built for the high-volume, fast-moving environment of exhibitions, helping teams organise what they want to achieve before the show, capture what happens on the floor, and turn conversations into structured opportunities and actions immediately afterwards.

CRM IS PRIMARILY RECORD-CENTRIC

Contact > Company > Deal > Activity > Pipeline

EXPOLEAD IS EXHIBITION-CENTRIC

Exhibition > Target > Booth > Person > Conversation > Product / need >
Opportunity > Commitment > Follow-up > Outcome

“Can’t we just use our CRM at the exhibition?”

Yes, you can. The question is whether it was designed for that job.

EXHIBITION ACTIVITY	GENERAL CRM you configure & maintain it	EXPOLEAD OS built for expos, no setup
Store companies & contacts	Core capability	Supported
Long-term customer relationships	Core capability	Not its primary purpose
Sales / deal pipeline	Core capability	Supports the opportunity journey
Plan companies & booths to visit	Build it: custom fields & setup	Ready to use
Track visited & unvisited targets	Custom fields & team discipline	Ready to use
Capture conversations on the floor	Heavy data entry at the booth	Designed for the floor
Record booth & exhibition context	Extra custom fields to build	Native, out of the box
Capture product, need & opportunity	Manual fields & steps	Exhibition-first flow
Prioritise contacts right after meeting	Manual tagging	Built into the flow
Track commitments (sample, quote)	Generic tasks to set up	Tied to the interaction
See everything from one exhibition	Custom reports to build	Exhibition-level view
Understand exhibition outcomes	Needs data model & reports	• CORE DIRECTION
Long-term nurturing & accounts	Core strength	Designed to complement

Possible is *not the same as* practical. Almost all of this can be built in a CRM with custom fields, workflow configuration and team discipline, a setup project in itself. ExpoLead is built for the exhibition and works out of the box, with no configuration.

A CRM CAN BE USED AT A SHOW · EXPOLEAD IS DESIGNED FOR IT

THE EXHIBITION REALITY

- Where do I go next?
- Which booth is this?
- Has a colleague visited them?
- Who did I speak to?
- What product did they want?
- Did I promise a sample?
- Is this one serious?
- Who follows up?

Dozens, sometimes hundreds of conversations, moving fast. ExpoLead is being designed around this environment, not a quiet desk.

THE REAL PROBLEM IS FRAGMENTED EXECUTION

- Business cards
- Phone contacts
- WhatsApp
- Notebook notes
- Photos
- Spreadsheets
- Memory
- One exhibition workspace
structured & searchable

The real problem is not your CRM. It is **fragmented exhibition execution**, brought into one place.

FROM LEAD CAPTURE TO EXHIBITION INTELLIGENCE

• BEFORE

- What are our objectives?
- Who are our targets?
- Which booths matter?

• DURING

- Who has the team met?
- What opportunities are emerging?
- Who is high priority?
- What was committed?

• AFTER

- What came out of the show?
- Which opportunities need action?
- Who owns each follow-up?
- Which products drew interest?

• OVER TIME

• DIRECTION

- Which shows created real opportunities?
- Which led to samples, quotes or orders?
- Which shows deserve future investment?

Not a business-card scanner. An **Exhibition Intelligence Workspace**.

ExpoLead doesn’t replace your CRM. It owns the **exhibition layer**.

Before, during and immediately after the show. Your CRM keeps the relationship, pipeline and revenue.

ASK YOUR TEAM

- ? Back from a show with 50 to 100 conversations, how do you manage everything from that specific exhibition?
- ? How do you separate serious opportunities from casual chats?
- ? Six months on, can you trace a deal back to the show it started at?
