

TWO SYSTEMS. TWO DIFFERENT JOBS.

Your CRM manages the relationship. ExpoLead manages the exhibition journey.

ExpoLead does not replace your CRM. It gives your exhibition team a purpose-built workspace for the part of the commercial journey that happens before, during and immediately after the show.

EXPOLEAD OS · THE EXHIBITION LAYER

YOUR CRM · THE RELATIONSHIP LAYER

01

Before expo PLAN

- Set targets
- Identify companies
- Prioritise booths
- Prepare objectives

02

During expo CAPTURE

- Record conversations
- Identify opportunities
- Set priorities
- Note next actions

03

After expo CONVERT

- Follow up
- Track commitments
- Progress opportunities
- Read exhibition outcomes

HANDOFF · QUALIFIED LEAD TO YOUR CRM

04

Ongoing sales MANAGE · CRM

- Contacts & accounts
- Deals & pipeline
- Activities
- Customer relationships
- Revenue

CRM systems are excellent at managing structured customer and sales data over time. ExpoLead is purpose-built for the high-volume, fast-moving environment of exhibitions, helping teams organise what they want to achieve before the show, capture what happens on the floor, and turn conversations into structured opportunities and actions immediately afterwards.

CRM IS PRIMARILY RECORD-CENTRIC

Contact > Company > Deal > Activity > Pipeline

EXPOLEAD IS EXHIBITION-CENTRIC

Exhibition > Target > Booth > Person > Conversation > Product / need >
Opportunity > Commitment > Follow-up > Outcome

A CRM begins where the exhibition ends.

Your CRM starts with the lead. ExpoLead is everything that happens before it becomes one, then it hands your CRM a clean, qualified opportunity when the show is done.

THE EXHIBITION · EXPOLEAD RUNS THIS

Plan targets & booths > Capture on the floor > Prioritise on the spot
> Track commitments > Structure the outcome

Hall, booth, product and conversation context, captured at booth speed across dozens of meetings, then turned into structured opportunities.

ONE CLEAN, QUALIFIED LEAD

Acme Foods Ltd

John Perera, Buyer

Needs: 500 MT, monthly

Priority: High, sample promised

YOUR CRM STARTS HERE

Contact & deal created

Stage: open

Owner assigned

From here your CRM does what it does best: long-term relationship, pipeline and revenue.

WHY A LEAD-CAPTURE FIELD IS NOT ENOUGH

Where do I go next? Which booth is this? Has a colleague visited them?
Who did I speak to? What product did they want? Did I promise a sample?
Is this one serious? Who follows up?

Dozens, sometimes hundreds of conversations, moving fast. **This is an operation to run**, not a record to type up later.

TODAY THAT OPERATION IS SCATTERED

Business cards Phone contacts WhatsApp Notebook notes
Photos Spreadsheets Memory

One exhibition workspace
structured & searchable

ExpoLead brings it into one place, **so the lead that reaches your CRM is clean**, not a guess.

Not a business-card scanner. **An Exhibition Intelligence Workspace** that turns each show into structured commercial intelligence over time.

• DIRECTION

The lead is the finish line for the exhibition, and the starting line for your CRM.

No rip and replace. Take the clean lead into whatever CRM you already use.

ASK YOUR TEAM

- ? Back from a show with 50 to 100 conversations, how do you manage everything from that specific exhibition?
- ? How do you separate serious opportunities from casual chats?
- ? Six months on, can you trace a deal back to the show it started at?
